

Oracle APEX - Application Express 3.2.1 inclut deux nouveaux composants **AnyGantt** pour créer des diagrammes de Gantt et **AnyMap** pour créer des cartes.

Note : Oracle APEX 3.2.1 livrée fin août ne fonctionne avec le composant AnyMap, téléchargez le patch N° 8548651 sur Oracle Metalink. Si vous ne pouvez pas accéder à Oracle Metalink, téléchargez et réinstallez la version APEX 3.2.1.

Ajouter un diagramme de Gantt dans une page Oracle APEX - Application Express

Créez une nouvelle page.

Créez une nouvelle région : graphique Flash à colonnes 2D.

Dans la section **Interrogation SQL**, entrez

```
select null link, 'a' label, 1 value from dual;
```

Dans la section **Définition de région**, modifiez la **région source**, remplacez à deux endroits dans ce bloc le nom et l'emplacement du fichier :

```
"#IMAGE_PREFIX#flashchart/#CHART_TYPE#.swf
```

par

```
"#IMAGE_PREFIX#flashchart\anygantt_4.0.3\swf\AnyGantt.swf
```

Cette instruction indique à Apex où se trouve le fichier AnyGantt.swf.

Ensuite, dans la section **Attributs graphiques** :

Passez le paramètre **Utilisez du XML personnalisé** à **Oui**.

Copiez le code XML ci-dessous dans la zone de texte **XML Personnalisé** :

```
<anygantt>
  <settings>
    <navigation enabled="True" position="Top" size="30">
      <buttons collapse_expand_button="false" align="Far"/>
      <text>Graphique - Ressources humaines</text>
      <font face="Verdana" size="10" bold="true" color="White"/>
      <background>
        <fill type="Gradient">
          <gradient>
            <key color="#B0B0B0" position="0"/>
            <key color="#A0A0A0" position="0.3"/>
            <key color="#999999" position="0.5"/>
            <key color="#A0A0A0" position="0.7"/>
            <key color="#B0B0B0" position="1"/>
          </gradient>
        </fill>
        <border type="Solid" color="#494949"/>
      </background>
    </navigation>
  </settings>
  <datagrid width="132">
```

```

        <columns>
            <column attribute_name="RowNum" width="30">
                <header>
                    <text>#</text>
                </header>
            </column>

</periods>

</resource_chart>

</anygantt>
```

La balise **<resource..>** fournit le nom de l'acteur et la balise **<period resource..>** indique la période.

Ajouter une carte dans une page Oracle APEX - Application Express

Créez une nouvelle page.

Créez une nouvelle région : graphique Flash à colonnes 2D.

Dans la section **Interrogation SQL**,

entrez

```
select null link, 'a' label, 1 value from dual;
```

Dans la section **Définition de région**, modifiez la **région source**, remplacez à deux endroits dans ce bloc le nom et l'emplacement du fichier

```
"#IMAGE_PREFIX#flashchart/#CHART_TYPE#.swf
```

par

```
"#IMAGE_PREFIX#flashchart/swf/AnyChart.swf
```

Cette instruction indique à ApEx où se trouve le fichier Anychart.swf.

Ensuite, dans la section **Attributs de graphique**,

Passez le paramètre **Utilisez du XML personnalisé** à **Oui**.

Dans le bloc **XML Personnalisé**, copiez le code suivant :

```
<?xml version = "1.0" encoding="utf-8" standalone = "yes"?>
<anychart>
  <settings>
    <maps path_type="Absolute" path="" />
    <resources path_type="Absolute" path="" />
  </settings>
  <charts>
    <chart plot_type="Map">
      <chart_settings>
        <title><text>USA Sub-Regions</text></title>
      </chart_settings>
      <data_plot_settings>
        <map_series source="/i/flashchart/swf/maps/usa/country/states.amap"
id_column="REGION_NAME">
          <border enabled="True" opacity="0.15"/>
          <effects enabled="True">
            <drop_shadow enabled="True" opacity="0.4" distance="2"/>
          </effects>
          <grid>
            <parallels enabled="False"/>
            <meridians enabled="False"/>
            <background enabled="False"/>
          </grid>
          <defined_map_region>
            <label_settings enabled="True">
              <format>{%REGION_ID}</format>
              <font color="Rgb(70,70,70)"/>
              <background enabled="False"/>
            </label_settings>
            <tooltip_settings enabled="True">

Si vous ajoutez un fichier XML exemple à partir de la galerie AnyChart, pensez à ajouter ces lignes :

```

<settings>
<maps path_type="Absolute" path="" />
<resources path_type="Absolute" path="" />
</settings>

```

Elles indiquent les chemins des cartes et des ressources (images, etc..).
